

Development incubator

Business incubation is a dynamic process of business development which supports decreasing the failure rate of the company in the early developing phase, accelerates the growth of the companies that have the potential for employment and profits, and helps innovative ideas being commercialised.

- Business incubator is an efficient instrument of business development, and thus it is the part of the infrastructure for businessmen to support them in the business establishing, development of 'new-born' companies and the survival in the first phase of doing business.
- Specific facilities that the Zone offers: area, infrastructure, availability of technical equipment, shared meeting premises, 'soft' service packet – training, expertise, consulting, mentoring, netting, and others.
- Managing work area, intensive business support and consulting and selective policy of joining and quitting (clearly defined criteria for joining and the period of staying in the incubator).

Basic function:

- Help to the entrepreneurs in setting up new enterprises;
- Support to enterprises during the first work phase;
- Opening new jobs
